

# Gaspar Gómez Kral

## Full-Stack Software Developer

+34 640 701 862 · [gaspargkral@gmail.com](mailto:gaspargkral@gmail.com) · [gasparkral.github.io/portafolio](https://gasparkral.github.io/portafolio) · [github.com/GasparKral](https://github.com/GasparKral) · [LinkedIn](#) · Spain

## Professional Profile

Full-Stack developer with a Higher Degree in Multiplatform Application Development (DAM) and hands-on experience across web, mobile, and desktop projects. Proficient in the JVM stack (Java, Kotlin, Spring Boot, Ktor) and the JavaScript/TypeScript ecosystem (React, Astro, Next.js, Express). I ship complete projects end-to-end and apply CI/CD workflows with Docker. Passionate about applied AI: I design AI-assisted development workflows with Claude, build custom context and memory systems, and have experience developing MCP servers. Looking to join a team where I can contribute from day one and keep growing.

## Technical Skills

|                  |                                                                                                                                                                                                                                           |

## Professional Experience

- Gabinete Projecto Software (G.P.S)** · *Junior Developer — Contract + Internship* 7 months
- Maintained and developed modules for web and desktop applications in a real production environment.
  - Bug fixing, code reviews, and delivery of small features within a professional team.
  - Hands-on experience with team-based development cycles, version control, and code documentation.

## Featured Projects

[FitMe](#) — Full server + desktop system for sports training management, workout planning, and progress tracking.

**Stack:** [Ktor](#) · [Kotlin](#) · [Jetpack Compose](#) · [Kotlin Multiplatform](#)

[DnD The Game Tracker](#) — Desktop assistant for tabletop RPG sessions — rich UI, character management, and real-time inventory.

**Stack:** [Rust](#) · [Dioxus](#) · [Kotlin](#) · [Jetpack Compose](#) · [CSS](#)

[Compose Desktop Router](#) — Open-source routing library for Jetpack Compose Desktop, published on GitHub.

**Stack:** Kotlin · Jetpack Compose Desktop

**[Personal Portfolio](#)** — Personal site with blog, i18n support (ES/EN), and React components inside Astro.

**Stack:** Astro · React · TypeScript · Tailwind CSS

## Education

---

**Higher Degree — Multiplatform Application Development (DAM)**

Completed

**Scientific-Technological Baccalaureate**

Completed

---

## Languages & Competencies

---

### Languages

Spanish — Native

English — B2 Upper-Intermediate

### Personal Competencies

Self-taught · Autonomous · Quality-driven

Clean, documented, maintainable code

Able to take projects from zero to production solo
